System Requirements for Kaspersky Internet Security 20 for Windows

Latest update: September 12, 2023 ID: 15070

General requirements

- A CD-ROM or DVD-ROM for installing the application from a disk.
- 1500 MB of free disk space.
- A processor that supports the SSE2 instruction set.
- Internet connection (for installation and activation, participation in the Kaspersky Security Network, as well as database and program module updates).
- Microsoft Internet Explorer 8.0 or later
 - We recommend using Microsoft Internet Explorer 9.0 or later for accessing My Kaspersky.
 - The Anti-Banner component works with restrictions. We recommend using Microsoft Internet Explorer 9.0 or later.
- Microsoft Windows Installer 4.5 or later
- Microsoft .NET Framework 4 or later
- Webcam access protection is provided only for [compatible webcam models](#).
- On 32-bit operating systems it's not possible to use a hypervisor for protection.
- The application cannot be installed on a system or by
